

Questionnaire with Dr. Taimour Langaee (Editor)

Journal of Pharmacovigilance

1. How many years have you been practicing and/or performing research?

14 Years.

2. What is the research topic you are working on now?

Pharmacogenetics, Personalized Medicine.

3. What makes an article top quality?

Novelty of research, Translational application of research, well reviewed.

4. What are the qualities you look for in an article?

Novelty of research, Translational application of research, inclusion of most recent references.

5. Do you have any research funding (NIH or other national funding) now?

Not as PI but co-investigator on a few grants.

6. When did you become an editor of OMICS Journal?

Last year.

7. What is your greatest career accomplishment?

Was co-investigator on 3 large multi-center clinical Cardiovascular Pharmacogenomics trials with more than \$35 million in funding;

Published more than 80 papers and 3 book chapters

National Committee Member:

NIH Warfarin Study (COAG Trial) Genotyping Subcommittee, 2008-2013

NIH Warfarin Study (COAG Trial) Reference Laboratory Subcommittee, 2008-2009

NIH PGRN and Deep Sequencing Resource Networkwide RNA-seq Project Subcommittee, 2011-Present

NIH PGRN Rare Genetic Variants (VIP CAPTURE PROJECT) Subcommittee, 2011-Present

University of Florida and College of Pharmacy Committee Member:

University of Florida Center for Pharmacogenomics Genotyping Core Laboratory, Director, 2002-present

University of Florida Genetics Institute, Member, 2003-present

Clinical and Translational Science Institute Genotyping Core Laboratory Consultant, 2007 to present

University of Florida, College of Pharmacy Admission committee, 2011-Present

University of Florida (UF&Shands) Personalized Medicine Program (PMP) Stakeholder, 2012-Present

University of Florida (UF&Shands) PMP subcommittee of the Pharmacy and Therapeutic (T&P) Committee member, 2012-Present

8. How does the research published percolate through to practitioners?

That's the quality of the research that is important to me. The research should be designed to solve problems, answer questions, innovate new methods so it can be translated to practitioners (eg. the work we are doing now at University of Florida-Heath Personalized Medicine Program).

9. What is the purpose of serving as an editor?

To help facilitate a better review process (eg. select the best reviewers who are expert on the subject) and increase the quality of articles being accepted for publication.

10. Do you have any patents?

Yes.

11. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

Yes.

12. Do you plan to contribute any editorials or papers to OMICS Journals in the next year?

Yes.

13. Do you have any trouble with OMICS Journals in the past?

No.

14. Would you recommend OMICS to your friends or colleagues?

Yes.

15. How do you differentiate Journal of Pharmacovigilance with other journals in the field?

It's more versatile in regard to publishing research works.
